

Rex Heat Treat NNPI Policy

Rex Heat Treat has and will comply with all required regulations for Naval Nuclear Propulsion Information (NNPI) which maybe be sent or transmitted to us. Since we only provide a service for our customer's parts it is critical that our customer notify us on all paper work including request for quotation, either hard copy or digital, if the parts being quoted or sent to us are sensitive NNPI information to be controlled on a "need-to-know" basis. Our standard ITAR controls will also be used as well as a need to know control must meet the ITAR requirements. Access to these documents will then be under plant manager's control to assure only person(s) under NNPI and ITAR regulations have access to any NNPI and/or ITAR part(s) information.
